

Concept Smoke Systems

ViCount Hazer - DMX Pressure Regulator

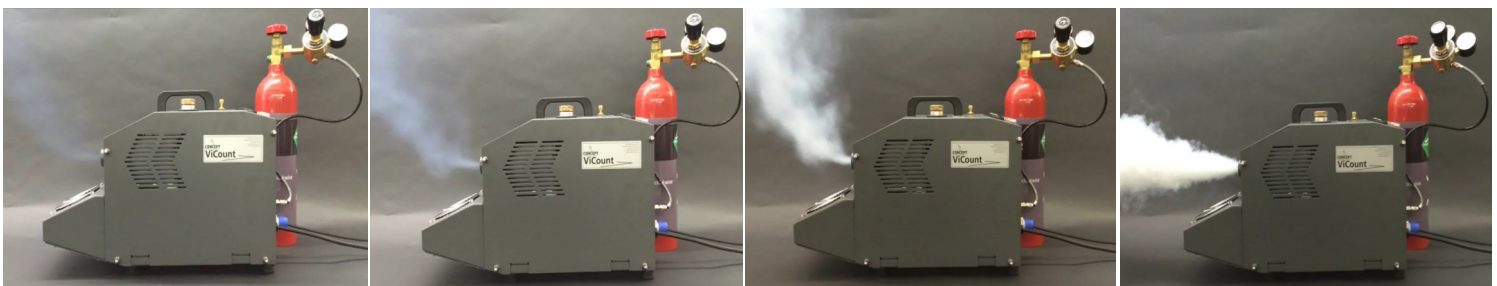

- Full volume control over the gas output via DMX Control Desk
- In-built mains power supply, allowing module to be used on any ViCount or Vulcan
- Allows extremely smooth, accurate & repeatable low - high output
- Extremely easy to operate / setup
- Can be fitted anywhere in gas supply line
- Quick connectors (available world-wide), allow quick set-up
- Still allows the Automatic Self Purge
- Can be used on any gas controlled hazer (connections may need modifying)

Concept's DMX Pressure Regulator was introduced to allow further versatility to the ViCount and Vulcan smoke / haze generators.

The new DMX Pressure Regulator allows users to control the haze / smoke output from 0-100% from your DMX controller. Continuous maximum output is still achievable.

The ViCount and Vulcan Hazers are already fitted with an external mixing valve that allows users to create anything from extremely thin haze all the way to thick smoke.

Power Supply	110v - 230v
Gas Couplings	Camozzi
Bottle to DMX-PR	5150 Male
Gas Coupling	Rectus
DMX-PR to Machine	21KBKS06MPX Female
Max Output	120 PSI / 8.2 Bar
Size (approx)	24 x 11 x 8cm
Weight	1.8kgs
Operating Temp	0—50°C
